

## About Portfolio

The Core Balanced Portfolio aims to deliver returns through a combination of capital growth and income. This portfolio adopts a balanced investment approach, targeting long-term capital appreciation by investing in open-ended funds, comprising both equities and fixed income.

### Who is the portfolio targeted at?

This portfolio is designed for investors seeking a core, liquid investment solution focused on traditional asset classes, specifically fixed income and equities. With a 60% allocation to equities, it is well-suited to those who prefer a balanced investment strategy. It is ideal for investors looking for long-term returns over an investment cycle, combining significant exposure to equity markets with fixed income investments. This model is targeted at return-seeking investors focused on capital growth, who have the risk tolerance and capacity for loss to handle potentially significant fluctuations in capital values due to exposure in equities.
