## About Portfolio

The Core Defensive Portfolio aims to preserve capital while delivering modest returns through a combination of income and capital growth. The primary objective is capital preservation, targeting steady growth with minimal fluctuations in portfolio value. The portfolio invests in open-ended funds, with a focus on equities and fixed income, particularly emphasising fixed-income exposure.

### Who is the portfolio targeted at?

This portfolio is designed for investors seeking a core, liquid investment solution focused on traditional asset classes, specifically fixed income and equities. With around 20% allocated to equities, it is ideal for those who want significantly lower risk than full equity exposure. It is particularly suited for investors prioritising capital preservation, while aiming for modest returns through a combination of income and capital growth.

### Capital at risk. Performance shown reflects simulated past performance, which is no guarantee of future results.

The returns shown may not be the same as the returns of an investor's actual account. This is due to various factors, including the investment date of the investor and differences across platforms. The returns are calculated through Morningstar Direct, and are provided for illustrative purposes only, and should not be viewed as the performance of an actual account. All performance is shown net of the holdings' management fees and expenses and includes Binary Capital's annual management charge; however, it does not include the advisor fees or the platform fees. Therefore, the actual performance experienced will be lower once these charges have been taken into account.
