About Portfolio

The Passive Balanced Portfolio aims to deliver returns through a combination of capital growth and income. This portfolio adopts a balanced investment approach, targeting long-term capital appreciation by investing in a diversified mix of open-ended funds and ETFs, comprising both equities and fixed income.

Who is the portfolio targeted at?

This portfolio is designed for investors seeking a low-cost, liquid investment solution focused on traditional asset classes, specifically fixed income and equities. With a 60% allocation to equities, it is well-suited to those who prefer a balanced investment strategy. It is ideal for investors looking for long-term returns over an investment cycle, combining significant exposure to equity markets with fixed income investments. This model is targeted at return-seeking investors focused on capital growth, who have the risk tolerance and capacity for loss to handle potentially significant fluctuations in capital values due to exposure in equities.

The returns shown may not be the same as the returns of an investor's actual account. This is due to various factors, including the investment date of the investor and differences across platforms. The returns are calculated through Morningstar Direct, and are provided for illustrative purposes only, and should not be viewed as the performance of an actual account. All performance is shown net of the holdings' management fees and expenses and includes Binary Capital's annual management charge; however, it does not include the advisor fees or the platform fees. Therefore, the actual performance experienced will be lower once these charges have been taken into account.
